

The following is written by Bayview Bob:

Commissioner Tondee is making waves in Bayview, as he proposes to remove the no-wake zone from Bayview's quiet and peaceful Scenic Bay.

If he gets his way, say hello to LOUD boats and jets skis, 12 hours a day for the entire summer. How many people will be killed by boats and jet skis flying around the entrances to private docks, marinas, and public boat launches.

This is a perfect example of politicians creating a problem, where no problem currently exists.

This bay is the last good place for Kokanee to spawn and the huge increase in wave action will probably silt in the gravel beds and kill the eggs.

I am currently waiting for replies to an email sent to each commissioner, asking them to state their opinion on the matter, and will publish each of their replies as soon as I hear from them.

Call, write or email the Commissioners and let them know how you feel about the subject.
