

Dear Mr. Maxson,

Please add my name to the list of local residents who have watercraft berthed in Scenic Bay, and approve the existing 'No Wake Zone' policy.

On many occasions during the 3 years that we have kept our 23' cruiser at various marinas, we have seen potential collisions and/or capsized watercraft just outside the posted zone, proving to us that many people are completely oblivious to the effects of their wake when confined to a relatively narrow area. I can only assume that the removal of the existing restrictions inside that zone would not only increase the frequency of these dangerous situations, but would also allow additional activities such as water-skiing and wakeboarding to occur within the zone.

Please register our opposition to this proposed restriction change, as we may not be able to attend the meeting in Cd'A. Thank you for your assistance.
