Subject: No Wake Zone @ Scenic Bay

Dear Commissioners,

I strongly support leaving the no wake zone in place. I can not for the life of me understand how any rational person could suggest lifting that zone.

My family has had a float home at Boileaus Marina since 1973 and I believe at that time the NWZ was not in place. I can remember that float home banging and swaying every time a boat went by that was creating a wake. I am sure you are aware that these marinas now have sewer systems which could very easily become damaged with terrible consequences to the lake. There is also the consideration of the Kokanee spawning grounds which would be adversely affected by lifting the NWZ, and for all the money that has been spent on trying to save the Kokanee, it is hard for me to rationalize what the thinking could be. There are all kinds of activities and boat traffic within the Bay and the safety of all would definitely be impacted.

I had the pleasure of almost being run over by a high speed boat as I was just about to enter the Zone. It was dark, the skipper of that vessel had to take immediate action to narrowly miss me and the sound of his engine did not alter a bit...I wish I could find out who that skipper was!

I will not be able to attend the upcoming meeting regarding this issue but did not want my absence to be construed as being in favor of lifting the NWZ.

I truly hope that common sense will prevail and that the NWZ will remain.

Thanking you in advance for any considerations that you can afford all of us concerned users of the lake.

Dave Naccarato
