Please pass this onto the required sources.

By all means, please maintain the present "no-wake" zones!!! Aside from the minor cost of maintaining the buoys, [just raise the boat fees a few bucks], the safety issues and noise takes precedence over all other concerns. All we need are more speed boats anxious to get out onto the "open-lake" to open their throttles full within the present wake-zone.

Think of the many kayakers and leisure boaters and canoe folks/kids who would be affected by such a change. Bayview is a place to visit, relax, and wind-down. If you can't take the time to do such - why bother - just stay where you're at!
