Subject: No Wake Zone in Bayview

LEAVE BAYVIEW ALONE AND THE NO WAKE ZONE AS IT IS.

The No Wake Zone works, keeps the people who live, enjoy non-motorized recreation as well as those who have their boats in slips there safe. If it inconveniences some the out-of-town idiots that want to blast through this peaceful community without any consideration of anyone else's rights and the calm serenity that has been a big part of the reason many come to Bayview, that's fine with us.

There is already an instant-high-speed alternative to launching their boats at Bayview, it's called the FARRAGUT STATE PARK Launch Ramp. For \$4 a day or \$25 a year, they can blast away without ruining a complete community.

As for the concern about the buoys, step-up and buy some new ones and replace them. If the original ones have lasted 20-25 years it sure sounds like a low cost item if you amortize it. *It will certainly be cheaper than defending the County against future lawsuits that arise from any decision to implement this ill-considered idea and ends up getting someone maimed or killed.*

Do ANY of the members of your Board live or have a personal interest in Bayview or the surrounding area? Somehow I doubt it. Stop listening to a few loudmouths that file frivolous complaints and that have little or no stake in the long-term future of Bayview and put an end to this stupidity before we end your tenure on the Board the next time you come up for re-election.

This is not public service, this is Government Stupidity at it's finest. It should not and will not stand. We are watching and WE VOTE.

LEAVE BAYVIEW ALONE AND THE NO WAKE ZONE AS IT IS.
