Dear Commissioners:

"If it ain't broke, don't fix it!"

Conversely, if it's breaking, in this case eroding shorelines and creating hazards, do something.

With more people and bigger, faster boats, the county needs to assess expanded no-wake zones on all waterways.

While we all love doing whatever we please, wherever we please, protecting shorelines, marinas and recreational safety should not be compromised.

Slow down and enjoy the view. "
