Subject: Elimination/Reduction of No Wake Zone@Bayview

Date: Sat, 5 Sep 2009 09:44:01 -0700

Sir:

I am a resident of Bayview with a view extending from Cape Horn to the town of Bayview and have watched the impact of vessels violating the "No Wake Zone" on a daily basis. Sporadic Marine Sheriff enforcement immediately reduces the noise and wakes and the subsequent pounding of docks, moored boats and shoreline.

Safety is not compromised for vessels trolling or stationary fishing while in the "No Wake Zone" nor are kayakers in danger. Our current decibel laws are not enforced and the results are akin to living on a drag strip due to the unique topography of the bay.

Anarchy will result with any reduction or elimination. To view what will be the result just spend a few minutes in Bottle Bay in Bonner County. The exaggerated 20 minute transit time through the bay could be eliminated by launching at the Farragut public launch if time is the issue.

I respectfully ask that you reconsider this proposal for the sake of this precious resource.

Respectfully submitted,

Stanis J. Deery
